

Congratulations, Miss Yu Yan CHEUNG!

🎉 We are deeply honored to celebrate your achievement at the Innovation and Technology Scholarship 2026 Award Presentation Ceremony. Here is her message:

I am deeply honored to receive the Innovation and Technology Scholarship 2026 in the Life and Health Technologies area. My journey began with an elderly care initiative I co-founded in high school. Spending time with elderly residents in nursing homes and listening to their struggles with movement and social isolation made me realize that even when technologies exist, some fail to perform at their maximum potential for those who need them most.

This scholarship will allow me to explore gerontechnology from different perspectives, particularly how digital tools and user-centered assistive devices can be designed to help Hong Kong's elderly age with dignity and independence. I look forward to learning from international exchange opportunities and internship programs and bringing back valuable insights to our local community.

Big congratulations to Eleanor!
