Title: Department of Biomedical Engineering Successfully Showcases Programs at the 2nd Hong Kong Higher Education Expo

The Department of Biomedical Engineering is pleased to announce our successful participation as an exhibitor at the highly anticipated 2nd Hong Kong Higher Education Expo. The event, held at the Shenzhen World Exhibition & Convention Center on 18 May 2024, provided an excellent platform for our department to promote our undergraduate and MSc programs.

As one of the leading departments in the field of biomedical engineering, CUHK's Department of Biomedical Engineering seized the opportunity to showcase its academic offerings and engage with prospective students at the expo. We are proud to have shared our expertise and passion for the field of biomedical engineering with the attendees.

During the expo, our booth featured interactive displays, cutting-edge projects, and engaging demonstrations that captivated visitors' attention. Prospective students had the opportunity to explore the exciting world of biomedical engineering and gain a deeper understanding of our department's programs, research initiatives, and career prospects.

Prof. GAO Zhaoli, along with our staff (Pel Kwok, clerical assistant) and student representatives (Liu Qijun, Master of Science student in Biomedical Engineering Year 1 and Zhang Laibohan Tony, Undergraduate in Biomedical Engineering student Year 1) were present to offer personalized guidance and answer visitors' queries. Their expertise and experience offered valuable insights into our curriculum, research opportunities, and the broader impact of biomedical engineering on society.
